

HARIDHARAN B S

Software Engineering | AI & Machine Learning Student

 Bengaluru
 haridharanbs2006@gmail.com
 +91 9025576290

PROFILE

Computer Science student passionate about full-stack development, AI/ML, backend engineering, and scalable software systems. Seeking Software Engineering internships.

SKILLS

Python

Java

JavaScript

C/C++

React

Node.js

Express

PostgreSQL

MongoDB

Docker

Git

TensorFlow

Scikit-learn

Pandas

EXPERIENCE

Software Intern

- Bharat Electronics Limited (May–Jun 2026)
- Built AI Medical Prescription Generator with speech-to-text and PDF export.
- Developed ICD-10/11 RAG chatbot using semantic search and LLMs.
- Worked with React, Node.js, Express, PostgreSQL, MongoDB, Docker and REST APIs.

PROJECT HIGHLIGHTS

- OAuth Authentication System — JWT, OAuth2/OpenID Connect, PostgreSQL, Docker, KrakenD, Nginx.
- AI Resume Sorter — NLP-based resume ranking.
- ICD Query Chatbot — Semantic PDF search.
- AI Prescription Generator — Full-stack healthcare application.

EDUCATION

Vellore Institute of Technology, Chennai
B.Tech CSE (Artificial Intelligence & Machine Learning)
CGPA: 8.76/10
Expected Graduation: 2028

CERTIFICATIONS

- Machine Learning Specialization
- Neural Networks and Deep Learning
- Elements of AI
- Pandas (Kaggle)

COURSEWORK

- Data Structures & Algorithms • DBMS
- Operating Systems • Computer Networks
- Artificial Intelligence • OOP

OBJECTIVE

Looking for Software Engineering internships to contribute to scalable software and AI-driven products while strengthening backend, ML, and distributed systems expertise.
